Profile

I am currently completing my final year of a BA Hons Photography having started to retrain in a new career following a change of life plan.

So far on the course we have produced location shots, studio and product photography, short photographic style video productions. These have been produced using the latest software and creative cloud suite especially Photoshop, Bridge, InDesign and Premiere Pro.

This experience has taught me a great variety of skills in order to tackle photography jobs quickly and effectively. Familiar with taking high quality digital photographs, including framing, selecting and setting up lighting, and determining advanced shutter and lens options.

I have become proficient at working to creative photography briefs and to timescales required for academic submission.

My previous experience working in the high-pressure Print environment has also taught me the importance of deadlines and many of the skills are transferable to the Photographic industry.
